

RTI Data Guidance Document

K-5 Mathematics

The RTI Data Guidance Document is a guide for building and grade-level teams to use when analyzing sources of data for each grade level. The document serves as a tool to assist teams in identifying students for **intervention services** and increased **progress monitoring**.

It is a *core principle of RTI* that we
use data to guide our intervention placements and
determine which students need ongoing progress monitoring
as part of a universal prevention plan.

Summative, formative, and diagnostic assessments all play an important role in understanding the whole child, and not one source of data should be used to identify needs of our students. Collaborative problem-solving around the needs of each student is used in conjunction with this standard-protocol process.
